**High-risk anaesthesia cases with
Board Certified Veterinary
Anaesthesiologists**

About Our Founder

Dr. Will Basuki was born and raised in Jakarta, Indonesia. She graduated from UQ in 2010. She worked as a small animal GP before joining QVS and Pet ER for two years of rotating and surgery internships. She pursued her career and accepted a 3-year residency position in dentistry and oral surgery with a master's degree at Colorado State University. She then worked as a vet dental specialist and became an Adjunct Associate Professor at Tufts University.

She returned to Australia in 2020 to be the first and only registered dental specialist (small animal) in QLD.

Will is a well-known speaker both nationally and internationally, and she is also an active committee member in both ANZCVS (examiner) and AVDC. She is also an Adjunct Lecturer at University of Queensland.

She owns two cats (Felix & Sabertooth 😊) and used to own two hamsters in the USA (Truffle & Oyster, RIP).
